

A guide for independent educational consultants and school counselors

Research mentorship your students can actually afford.

Structured, PhD-led and AI-supported. Built to be accessible, not exclusive.

About us

Real research, priced for the families you actually work with.

Buildemics connects Grade 6 to 12 students with PhD and graduate mentors from top global universities for structured, one to one research mentorship. Real independent work, at a price point that doesn't require your highest-net-worth families to say yes.

Why we built it this way

"Every research mentorship program on the market prices out most of the students who'd benefit from it. We built Buildemics to fix that, without cutting the parts that actually matter: real PhD mentors, real structure, real output."

The gap you already see

Demand is growing faster than the affordable options.

\$2.5k–10k

Typical cost per student for comparable one to one research mentorship programs.

Source: publicly listed pricing of comparable programs

9–12

The only grades most of these programs serve. Nothing for a student who wants to start exploring earlier.

Based on the same programs' published eligibility

7.6 lakh

Indian students studied abroad in 2024, nearly triple 2020. Demand for a credible research credential is rising.

Programs offered

Three programs. One price list, everywhere.

	Grades 6 to 8 Explorer \$499	Grades 9 to 12 Core \$849	Grades 9 to 12 Core and publication \$1,100
Grades	6–8	9–12	9–12
Mentor sessions	8	10	10
Writing and publication support	—	—	2 dedicated sessions
Deliverable	Exploration report and mini project	Research paper	Research paper and submission support
Mentor letter (LOR)	✓	✓	✓
Strengths and weaknesses report	✓	✓	✓
Duration	6 weeks	10 weeks	12 weeks

Prices in USD, per student. Submission support means we help you prepare and submit; acceptance is decided by the journal or conference, and we never guarantee it.

Not just a mentor match

Sarasyn, included

An AI research tool that adapts papers to how each student learns and answers their questions with sources cited, so no one is lost between sessions.

A real system, not a freelancer

Every student's progress is tracked. Mentors plan sessions from real data, not guesswork.

A profile, not just a paper

Students leave knowing what they're good at and which fields fit, based on how they actually worked.

Why partner with Buildemics

A research recommendation that's realistic, not aspirational.

We work together as partners to get the most value to your students.

-  Your students get a structured, PhD-mentored research program at a price that's accessible to the families you work with, not just the top of your roster.
-  **A premium add-on to your own services.** Not just commission revenue, but part of what you offer, adding value for the parents who join you.
-  **Bulk pricing for more than one paper.** Students usually do more than one project, and we can price multiple papers together.
-  No cost and no commitment on your end to refer.

How the partnership works

Take it as commission, or pass it on as a discount.

Keep the referral amount yourself, or offer it to your students as a discount on their fee. We're happy with either.

Core · \$849

10%

per enrolled student · \$84.90

Core and publication · \$1,100

12%

per enrolled student · \$132

- ✓ Paid per successfully enrolled student, tracked against your referral link or code
- ✓ We handle matching, scheduling and delivery end to end. Nothing lands on your plate.
- ✓ You can see your referred student's progress on request
- ✓ Formalised with a signed MOU, so terms are clear from day one

Partner program

Getting started takes three steps.

No fees and no minimum number of referrals. Terms are agreed in writing before you send a single student.

- 1 **A short call**
We walk through the program, pricing and partnership terms.
- 2 **Signed MOU**
Commission rate and terms locked in writing.
- 3 **You refer, we deliver**
Send students our way. We handle the rest.
